

Plant Creation & Conversion

Upgrade Your Title Plant With The Power Of Data Trace

Data Trace takes pride in managing one of the nation's largest network of title plants. The superiority of our service has been recognized and rewarded, which is why Data Trace is the popular choice for title underwriters.

No one is better equipped to upgrade and power your title plant than Data Trace, the industry's number one choice for advanced technology.

Proven Methodologies With An Established Track Record

We work hand-in-hand with our customers to identify unique requirements for searching and retrieving data. As a result, we created a state-of-the-art system that is customizable to your needs. We also created indexing strategies that enable our customers to quickly locate properties, chain parcel history, request document images, and automatically monitor new recordings against open orders.

Plant Creation & Conversion

- » One of the largest title services provider in the nation
- » Established track record
- » Time-tested procedures
- » Customized plant conversions
- » Regional conversion support

Plant Creation & Conversion

Time-Tested Procedures

Over time, Data Trace has developed a road map to superior service. We start with extensive research so that we understand critical search requirements and regional data anomalies, then we create custom conversion programs that translates data to our production platform. Once converted, the data is sampled extensively for consistency and integrity. We maintain and continually assess audit trails, following records as they migrate across platforms.

More Services, Less Hassle

Data Trace connects you to one of the nation's largest and most advanced repository of title, tax data and document images. Become part of a growing network of title plants that span the nation and enjoy the convenience of advanced software functionality and first rate support beginning from concept to implementation and beyond.

- » Established conversion methodology
- » Extensive planning, testing, and quality assurance
- » Software customization to accommodate local data requirements
- » Daily title plant update and maintenance
- » Plant access supported through the Data Trace System, the leading title processing platform in the industry
- » Ability to integrate tax searches and document and map image delivery*
- » Customized screen and search results
- » Local customer service and technical support
