

## Specialized Solutions

### Services That Simplify and Streamline Operations

Data Trace is committed to improving title office efficiency since the early days of automating title plants and tax information databases. Today, that quest continues as we are constantly exploring innovative ways to save you time and expense.

As we continue to expand our business, we strive to keep our technology nimble.

### Proven Solutions By An Industry Leader

With over 30 years of service to the title industry, we have successfully implemented many custom products that are driven by our customer's individual underwriting guidelines. No request is too small nor effort too big for our team of product experts to tackle. We work closely with you from initial concept to develop a solution to meet your exact specifications, and ensure your vision is carried out through implementation. By partnering with Data Trace, you can leverage premium data and workflow tools that enable you to achieve maximum business efficiencies.

### Specialized Solutions

- » Leverage premium data in your business processes
- » Innovative Technology puts you in control
- » XML data delivery options
- » Search using your order platform

# Specialized Solutions

## XML Data Delivery - Universal Gateway

Tap into one of the nation's largest title and processing network using your own production system. Universal Gateway links a customer's open order platform to our extensive database, creating an interface to any platform using an industry standard information protocol. Just send us your order number and property identifier, and we will transmit the results of our search or notify you by e-mail that the results are ready for retrieval. You control the desktop and workflow; and we provide the content.

- » Open orders on tax, title, and general index from propriety open order systems
- » Transmit tax parcel identifier, property address, or legal description and receive search results by e-mail, File Transfer Protocol (FTP), or Hypertext Protocol (HTTP)
- » Automatic notification of search completion
- » Internet compatible, using XML
- » Error notification on invalid search requests or multiple record matches
